The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over QP Corporation (Shunsuke 2000-308469) in view of Yamauchi (5,976,587) and QP Corporation (Toru 2000-210048) and Rooney taken together.

Shunsuki discloses the preparation of container-packed mayonnaise. The claims appear to differ from Shunsuki in the recitation of the amount of oxygen that is in the mayonnaise package. But packaging foods in oxygen-free containers is known in the art as shown by Yamauchi. Further replacing oxygen-containing air from emulsions to extend the shelf-life of mayonnaise is well known in the art as shown by Toru. With the references of Shunsuke, Yamauchi and Toru before him, it would have been obvious to extend the shelf-life of the mayonnaise of Shunsuki in the oxygen container of Yamauchi with the nitrogen flush of Toru to extend the shelf-life of the mayonnaise. It is appreciated that the particular amount of oxygen is not mentioned but one of ordinary skill in the art would be

expected to adjust the oxygen content of the mayonnaise in order to achieve an optimal product shelf-life. It is appreciated that an oxygen barrier container is not mentioned but oxygen barrier containers are well known in the art as taught by Rooney (page 1, lines 1-2 and page 4, paragraph 1.2.2.1)

No claim is allowed.
